

Stern Rail Brackets

- KATO Marine made two braces for Sea Dream to reinforce the stern rail when I installed my ForeSpar Davits. Stern rail was not rigid enough to support the dink without these bars. Two custom bars cost \$250. Not cheap- but excellent workmanship.
- Installation of these bars made a HUGE difference. My davits can now be used to their capacity rating.
- Jeff Carter Welding does the same high quality work but is less expensive.
